

Peddaboina Vedanand

+91-6304109241 | pvedanand2003@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Noida, UP

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3

Backend Engineering: Node.js, Express.js, REST APIs, WebSockets (Socket.io), Apache Kafka, Microservices Architecture, Event-Driven Design, JWT Authentication, API Versioning

Databases & Infrastructure: PostgreSQL, MongoDB, Redis, Docker, CI/CD, Git/GitHub, Postman

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP)

PROJECTS

Microservices-Based Job Portal | [Source Code](#) | *Node.js · TypeScript · Apache Kafka · PostgreSQL · Next.js* Jul 2025

- Architected a distributed job portal using Node.js microservices with Apache Kafka for event-driven, asynchronous communication between recruiter and candidate services, enabling decoupled horizontal scaling.
- Implemented stateless JWT-based authentication and authorization with multi-role access control (RBAC), Forgot/Reset Password flows, and token refresh—deployable across independent services.
- Designed and optimized PostgreSQL schemas for job listings, applications, and recruiter dashboards; query tuning reduced average API response time by ~35%.
- Integrated AI-powered Resume Analyzer and Career Guide modules via service abstraction, enabling scalable feature extension without cross service coupling.
- Defined service contracts, event schemas, and API versioning strategy to ensure backward compatibility and maintainability across independently deployable services.

Staynest - Property Rental Platform | [Source Code](#) | *Node.js · Express.js · MongoDB · EJS · Tailwind CSS* Jan 2025

- Built a full-stack property rental platform with complete CRUD operations, MVC architecture, and server-side rendering via EJS templating engine with Tailwind CSS for a responsive UI.
- Secured authentication using bcrypt password hashing, express-session, and express-validator for input sanitization; protected all sensitive routes against unauthorized access.
- Designed RESTful API endpoints for property listing, search, and booking workflows, ensuring clean separation of concerns between business logic and data layers.

Personal Portfolio Website | [Source Code](#) | *Next.js 16 · TypeScript · Framer Motion · Resend API* Jan 2026

- Designed and developed a fully responsive, component driven portfolio in Next.js 16 with TypeScript, featuring smooth animations and scroll-triggered transitions using Framer Motion.
- Integrated Resend email API to enable a serverless contact form, routing visitor messages directly to the owner without any backend infrastructure.

EDUCATION

Jaypee Institute of Information Technology (JIIT 128) 2022 – 2026

B.Tech, Computer Science and Engineering · Noida, UP

Sri Kakatiya Junior College 2019 – 2021

Intermediate · 94.2% · Nizamabad

Kakatiya High School 2019 – 2021

school · 93% · Nizamabad

CERTIFICATIONS & ACHIEVEMENTS

- Completed Deloitte Technology Job Simulation – Coding & Development (Jul 2025) [Credential](#)
- Completed Deloitte Cyber Security Job Simulation (Jul 2025) [Credential](#)
- Completed Deloitte Data Analytics & Forensic Technology Job Simulation (Jul 2025) [Credential](#)
- Solved 300+ algorithmic problems on LeetCode and GeeksForGeeks, covering arrays, trees, graphs, and dynamic programming.
- Secured 93rd percentile in JEE Mains (National Engineering Entrance Exam) among 1M+ candidates.
