| 🌐 portfolio | 📍 Noida, UP

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3

Backend Engineering: Node.js, Express.js, WebSockets (Socket.io), REST APIs, Microservices, Kafka

Databases & Infrastructure: PostgreSQL, MongoDB, Redis, Docker, Git/GitHub, Postman

Core CS Concepts: Data Structures & Algorithms, OOP

PROJECTS

Microservices - Based Job Portal | [Source Code](#) | *Next.js, Node.js, Kafka, PostgreSQL, TypeScript* **July 2025**

- Architected and implemented a distributed job portal using Node.js microservices with Apache Kafka for event-driven communication, enabling asynchronous recruiter–candidate workflows and decoupled service scaling.
- Engineered secure authentication & authorization flows (JWT, Forgot/Reset Password, multi-role access) across services, ensuring stateless, horizontally scalable backend infrastructure.
- Designed PostgreSQL schemas and optimized relational queries for job listings, applications, and recruiter dashboards, reducing average API response time by ~35%.
- Collaborated on service contracts, event schemas, and API versioning to ensure reliability and maintainability across independently deployable services.

Staynest - Property Rental Platform | [Source Code](#) | *Node.js, MongoDB, Express.js, EJS* **Jan 2025**

- Built a full-stack rental platform with complete CRUD operations for property listings, utilizing MVC architecture for scalable code organization.
- Secured user accounts by implementing bcrypt password hashing and express-session based auth, protecting routes with express-validator for input sanitization.
- Engineered server-side rendering using EJS templating engine paired with Tailwind CSS, delivering a responsive and dynamic UI across all listing and booking views.

Personal Portfolio Website | [Live](#) | [Source Code](#) | *Next.js, TypeScript* **Jan 2026**

- Designed and developed a fully responsive personal portfolio using Next.js 16 with TypeScript, showcasing projects, skills, and experience with a component-driven architecture.
- Engineered smooth UI animations and page transitions using Framer Motion, enhancing user experience with gesture-based interactions and scroll-triggered effects.
- Integrated Resend email API to build a functional contact form, enabling direct visitor-to-owner communication without any backend server setup.

EDUCATION

Jaypee Institute of Information Technology (JIIT 128) B.Tech, Computer Science and Engineering	2022 – 2026 Noida
Sri Kakatiya Junior College Intermediate (94.2%)	2019 – 2021 Nizamabad
Kakatiya High School GPA: 9.8	2018 – 2019 Nizamabad

CERTIFICATIONS & ACHIEVEMENTS

- Deloitte Technology Job Simulation – Coding & Development (July 2025) [Credential](#)
- Deloitte Cyber Job Simulation – Cyber Security (July 2025) [Credential](#)
- Deloitte Data Analytics Job Simulation – Data Analysis & Forensic Technology (July 2025) [Credential](#)
- Global Coding Rank: Solved 300+ algorithmic problems on LeetCode and gfg.
- Academic Excellence: Secured 93th percentile in JEE Mains (National Engineering Entrance Exam) among 1M+ candidates.
