

Peddaboina Vedanand

+91-6304109241 | pvedanand2003@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Bengaluru, KA

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, SQL

Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.io), Apache Kafka, Microservices Architecture, Event-Driven Design, JWT Authentication

Databases & Infra: PostgreSQL, MongoDB, Redis, Docker, GitHub Actions, AWS S3

CS Fundamentals: Data Structures & Algorithms, System Design

EXPERIENCE

Web Development Intern · Labmentix

Jan 2026 – Jun 2026

Bengaluru, KA · [labmentix.in](#)

- Built a full-stack Google Drive clone with Next.js and Node.js, featuring file upload, folder hierarchy, and user authentication; integrated AWS S3 for scalable cloud storage and retrieval.
- Diagnosed and resolved bugs in production Express.js REST APIs, improving endpoint reliability and reducing error prone edge cases across live user flows.
- Collaborated within a professional engineering team, participating in code reviews and maintaining clean version control practices via Git.

PROJECTS

Microservices Based Job Portal | [Source Code](#)

Jul 2025

Node.js · TypeScript · Apache Kafka · PostgreSQL · Next.js

- Architected a distributed job portal using Node.js microservices with Apache Kafka for event-driven, asynchronous communication between recruiter and candidate services, enabling decoupled horizontal scaling.
- Implemented stateless JWT-based authentication and authorization with multi-role access control (RBAC), Forgot/Reset Password flows, and token refresh deployable across independent services.
- Designed and optimized PostgreSQL schemas for job listings, applications, and recruiter dashboards; query tuning reduced average API response time by ~35%.
- Integrated AI-powered Resume Analyzer and Career Guide modules via service abstraction, enabling scalable feature extension without cross-service coupling.
- Defined service contracts, event schemas, and API versioning strategy to ensure backward compatibility and maintainability across independently deployable services.

Staynest Property Rental Platform | [Source Code](#)

Jan 2025

Node.js · Express.js · MongoDB · EJS · Tailwind CSS

- Built a full-stack property rental platform with complete CRUD operations, MVC architecture, and server-side rendering via EJS templating with Tailwind CSS for a responsive UI.
- Secured authentication using bcrypt password hashing, express-session, and express-validator for input sanitization; protected all sensitive routes against unauthorized access.
- Designed RESTful API endpoints for property listing, search, and booking workflows, ensuring clean separation of concerns between business logic and data layers.

EDUCATION

Jaypee Institute of Information Technology (JIIT 128)

2022 – 2026

B.Tech, Electronics and Communication Engineering · Noida, UP

Sri Kakatiya Junior College

2019 – 2021

Intermediate · 94.2% · Nizamabad

Kakatiya High School

2018 – 2019

School · 95% · Nizamabad

CERTIFICATIONS & ACHIEVEMENTS

- Completed Deloitte Technology Job Simulation – Coding & Development (Jul 2025) [Credentials](#)
- Completed Deloitte Cyber Security Job Simulation (Jul 2025) [Credentials](#)
- Completed Deloitte Data Analytics & Forensic Technology Job Simulation (Jul 2025) [Credentials](#)
- Solved 300+ algorithmic problems on LeetCode and GeeksForGeeks, covering arrays, trees, graphs, and dynamic programming.
- Secured 93rd percentile in JEE Mains (National Engineering Entrance Exam) among 1M+ candidates.
